REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Application serial no. 10/823,394 is being allowed since none of the prior art of record teaches or fairly suggests a method for preparing 5-azacytidine in plasma for quantitative analysis comprising the steps of mixing a plasma sample with acetonitrile and zinc sulfate, separating the mixture into an acetonitrile layer and a plasma layer by centrifugation, storing the centrifuged mixture at a temperature of less or equal to room temperature for at least about 3 hours and measuring the amount of 5-azacytidine in the acetonitrile layer using high performance liquid chromatography. In particular, none of the prior art of record teaches or fairly suggests a step of storing a centrifuged mixture of plasma and acetonitrile/zinc sulfate at a temperature less than or equal to about room temperature for at least about 3 hours. The closest prior art to Rustum et al only teaches of storing a plasma sample at a temperature of less than or equal to room temperature for a period of time, not a centrifuged mixture of plasma and acetonitrile/zinc sulfate. In addition, the prior art of record does not teach or fairly suggest evaporating the removed acetonitrile layer to yield or further quantify 5-azacytidine.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
